Additionally ABC Tool includes

- Updated Terms and Conditions
- Privacy Policies
- Added GDPR
- Updated Footer
- Frequently asked questions(FAQ's)

Fixed Issues

Area	Issues
Data Pages	Reduced number of java scripts due to the limitation.
User stamp required in the tables	Easy accessibility of user data.
User Data table	User_ID cannot be used as the user stamp in other tables. It needs to be given with a different name Ex: (User_Created) User_ID is not generally used as a Foreign Key.
Styles	Moved the inline CSS from the DataPages to common CSS.
